Dayton, Ohio 45439

Re: South Dayton Dump & Landfill
1975 Springboro Road
Moraine City

Dear Mr. Grillot:

On December 12, 1969, you requested an extension of our previous waiver on requirements for engineering plans until the south incinerator goes into full operation. We have no objection to granting your request. However, we suggest that you read very carefully our December 11, 1969 letter which explains in detail how to apply for your 1970 solid waste disposal license if you desire such a license.

If you are planning on accepting any other solid waste than that exempted by paragraph two of our December 11th letter, it will be necessary to obtain a new license by January 1, 1970. All solid wastes accepted after that date must be compacted and buried with a minimum of six inches (6") of earth each day. A finished cover of at least two feet (2') will be required. No burning of any material will be permitted.

If you have questions concerning this letter or if we may be of further technical assistance, please feel free to call upon us.

Sincerely yours,

ROBERT A. VOGEL, M.D.,
Health Commissioner
